

NOT ALL SHUTTERS ARE CREATED EQUAL. 5 TIPS FOR EVALUATING SHUTTERS

1. UNPARALLELED STYLE.

When evaluating aluminium shutters, consider whether design has been sacrificed for functionality. Combining cutting-edge engineering with usability and elegance, Weatherwell Elite are aluminium shutters like you've never seen before.

2. THE ADVANTAGE OF BLADE STAY.

A unique blade rack and pinion system allows the blades to be set in any position. Not only do Weatherwell Elite aluminium shutters provide unprecedented durability, flexibility and strength, with Blade Stay the blades can be positioned where you leave them.

3. SOME THINGS ARE BEST LEFT UNSEEN.

Weatherwell Elite aluminium shutters have been designed for exceptional usability, with no visible engineering. A two-part stile construction guarantees all working mechanisms are housed within the frame and internal blade rotation makes it the most streamlined shutter in the market.

4. EXTRAORDINARY DURABILITY TO WEATHER THE ELEMENTS.

Highly versatile, Weatherwell Elite aluminium shutters combine strength and durability to weather the harshest elements without sacrificing visual appeal.

5. EFFORTLESS MAINTENANCE.

Weatherwell Elite shutters are available in a number of contemporary colours and high quality timber grain powdercoats. The choice is yours for popular silver, white and black or you can have the warmth of a timber grain finish in an outdoor space that provides the luxury of no ongoing maintenance.

WEATHERWELL ELITE

Cutting-edge engineering and design

Unprecedented durability and strength

Blade positioning keeps blades where you leave them

Ultimate streamlined appearance
