Shadesol

Orders that are released to TWO are processed in the most timely manner possible. As such, any changes made to an order once it is released to TWO cannot be guaranteed to be applied.

Invoices for orders with multiple products are due upon receipt of each product.

If the order is already in production, initial costs, cancellations or any change costs will be the responsibility of the dealer to cover.

All drawings, notes and emails with questions must be answered before an order is entered in to the production line. Delays in the timely processing of these by customers will lead to longer lead times.

All factory/freight repairs are to have photographic/video proof. If neither are available at the time of placing the repair, it will be processed as a dealer responsibility. TWO will credit back the cost of the repair once proof of factory/freight responsibility is given.

For special request/non-standard/limited availability items please check first with Head Office for availability. Any surcharges for these items will be the responsibility of the dealer to cover, even if it is not listed on the price list.

PDF Estimates generated from the system may not reflect final pricing. If all items are not selected in the order form or details are added to the notes section, the price may be altered.

All dealers are responsible for having the most current price lists and product manuals. If unsure please contact your Account Manager to confirm.

TABLE OF CONTENTS

In order to prolong the life of your Shadesol blind and provide optimum performance, we recommend the following care and maintenance guidelines.

Regular Cleaning (At least every 3 months)
• Ensure surfaces are free from dirt, dust and grime.

• Clean the Shadesol blind with a soft brush.

• Run a soft brush along side channel to prevent dust and dirt build up.

• Clean aluminium with a soft cloth and warm soapy water or a small amount of mild detergent if required. Do not use abrasive cleaning agents (eg. Ajax or steel wool) in any circumstance.

Do Not:
• Do not leave the Shadesol blind down when you are away from your home or in extreme weather conditions.

• Do not roll the Shadesol blind up when wet (to avoid mould and mildew).

• Do not force the Shadesol blind up or down if it is jamming. Forcing the Shadesol blind may result in further damage. Contact your Shadesol supplier for guidelines of how to fix.

Common Characteristics:
Depending on the fabric selection, when the Shadesol blind is initially pulled down some ripples may be evident. The ripples will lessen over time as the weight of the blind will stretch the fabric slightly and the ambient temperature will heat the fabric.

When a motorised blind is operated some 'jolting' may be evident. This effect is due to wind gusts causing spontaneous friction between the fabric edge and side guides. This occurrence does not damage the blind.

⚠️ **Operate the Shadesol blind at least once a week to prevent build-up of dirt that will inhibit the operation of the blind.**

Shadesol

Automation: Connexoon Windows RTS *Temporarily unavailble to order from 15/10/2021*

Connexoon Window RTS is an intuitive, smart and playful app control solution designed to simplify your life.

• Control for up to 30 RTS channels per Connexoon from iOS and Android devices
• 4 scenarios per Connexoon
• 4 modes per Connexoon
• 8 schedules per Connexoon
• Automate window coverings with Scenes and Schedules
• Supports Up/Down/Stop commands and incremental control (tilt/brightness)
• Remote access via internet connection
• Ability to connect 4 smartphone devices
• Compatible with entire range of RTS products
• IFTTT (If This, Then That) compatible
• Ability to control via third-party voice assistants include Google Home and Amazon Echo
• Trigger scenes and schedules using voice commands or pre-set automations

Custom Colours

For custom colours, please refer to the current Dulux Powder Coat Selector.

Side Fit

Face Fit

Side Fit (Inside): The pivot arm blind is installed on the inside of the opening.

Face Fit (Outside): The pivot arm blind is installed on the front of the opening.

When determining the mount, check for any obstructions within or outside of the opening such as hand rails and check for out-of-square measurements, which may affect the operation of the blind as it moves up and down.

Drop/Arm length
## Componentry Breakdown

Pivot Arm, Box 120, Gear

Item # Description

1. Box 120 Back
2. Box 120 Cover
3. Box 120 End Plate set + screws

Automation: Connexoon Windows RTS

Connexoon Window RTS is an intuitive, smart and playful app control solution designed to simplify your life.

- Control for up to 30 RTS channels per Connexoon from iOS and Android devices
- 4 scenarios per Connexoon
- 4 modes per Connexoon
- 8 schedules per Connexoon
- Automate window coverings with Scenes and Schedules
- Supports Up/Down/Stop commands and incremental control (tilt/brightness)
- Remote access via internet connection
- Ability to connect 4 smartphone devices
- Compatible with entire range of RTS products
- IFTTT (If This, Then That) compatible
- Ability to control via third-party voice assistants include Google Home and Amazon Echo
- Trigger scenes and schedules using voice commands or pre-set automations

Remote: Situo RTS

Control all Radio Technology Somfy® (RTS) products such as draperies, roller/Roman shades, awnings and LED lights with an elegant Situo® RTS control. Sporting a sleek modern look, it's sure to add a touch of elegance to any decor.

Remote: Smoove 1 RTS

The Smoove® 1 RTS surface-mounted wall switch avoids cutting into drywall. This single channel, battery-operated solution is easy to install, and doesn't require an electrician. Compatible with seven decorative color frames (sold separately), users can easily complement any décor.
