MOTORISATION ACCESSORIES

Choose a single remote, multi-channel, or wall-mounted remote to control your motorised shades.

You can keep your wire-free battery motors continuously charged with slimline solar panels designed to work well in low-light conditions.

You can also install a wind and sun sensor that automatically opens or closes your shades according to weather conditions.

The accessories shown are a sample of what is available. There is a range of accessories to suit different types of motors.

HOME AUTOMATION

HUB & SMART DEVICE APP

Siri, open my shades! Automating your shades has never been simpler nor more intelligent through an integrated home automation system using a control hub and smart device app. The hub and app shown are a sample of what is available. There is a range of hubs and apps to suit different types of motors.
