

# Weatherwell Standard

Tips for evaluating exterior aluminium shutters

## QUALITY CONSTRUCTION

Not all aluminium shutters are created equal. The wall thickness of the material plays a key role in durability and performance. Weatherwell Standard aluminium shutters boast a robust 1.4mm wall thickness—around 15% more aluminium than many competitors that use just 1.2mm. This ensures greater strength and value for your investment.

## THE POWER OF CHOICE

Weatherwell Standard aluminium shutters are designed with versatility, offering multiple application options to suit your needs. Whether it's multi-fold, hinged, sliding, or fixed configurations, Weatherwell shutters deliver flexible solutions for:

- Unobstructed views
- Enhanced privacy
- Balcony or room enclosures
- Maximised living space

Whatever your requirements, Weatherwell provides a stylish and functional fit.

## THE BEST OF BOTH WORLDS

Why choose between beauty and durability? With Weatherwell Standard aluminium shutters, you can have both. Available in a range of realistic timber grain wraps, they bring the natural charm of wood to outdoor environments while offering unmatched durability and low-maintenance convenience. Weatherwell gives you the best of both worlds.

## BESPOKE CUSTOMISATION

Weatherwell aluminium shutters offer ultimate design flexibility. They can be colour-matched using high-quality liquid-baked enamel paint to perfectly complement any palette. Whether for interior or exterior use, Weatherwell Standard shutters are a seamless addition to any space, delivering style and functionality.
