BLIND PRODUCT GUIDE

V130525

TWO GUIDELINES

Orders that are released to TWO are processed in the most timely manner possible. As such, any changes made to an order once it is released to TWO cannot be guaranteed to be applied.

Invoices for orders with multiple products are due upon receipt of each product.

If the order is already in production, initial costs, cancellations or any change costs will be the responsibility of the dealer to cover.

All drawings, notes and emails with questions must be answered before an order is entered in to the production line. Delays in the timely processing of these by customers will lead to longer lead times.

All factory/freight repairs are to have photographic/video proof. If neither are available at the time of placing the repair, it will be processed as a dealer responsibility. TWO will credit back the cost of the repair once proof of factory/freight responsibility is given.

For special request/non-standard/limited availability items please check first with Head Office for availability. Any surcharges for these items will be the responsibility of the dealer to cover, even if it is not listed on the price list.

PDF Estimates generated from the system may not reflect final pricing. If all items are not selected in the order form or details are added to the notes section, the price may be altered.

All dealers are responsible for having the most current price lists and product manuals. If unsure please contact your Account Manager to confirm.

CARE & MAINTENANCE

- Most blind fabrics have stain-resistant protection.
- Cleaning and maintenance of the fabrics should be done with a vacuum and soft brush attachment to remove any loose dirt, fluff or dead bugs.
- Never use abrasive products or solvents/industrial based cleaners.
- If unsure, try cleaning a small inconspicuous area of the blind.

CHILD SAFETY REGULATIONS

For complete regulations, please refer to the Trade Practices (Consumer Product Safety Standard - Corded Internal Window Coverings) Regulations 2010.

Below is an excerpt from this document regarding standard installation instructions.
Standard - Installation Instructions

The installation instructions mentioned in paragraph 6(1)(c)* must include:

a) a statement that, to avoid creating a possible strangulation hazard for children, the corded internal window covering must be installed in such a way that a loose cord cannot form a loop 220 mm or longer at a height of less than 1600 mm above floor level; and

b) practical suggestions on how to install the corded internal window covering to ensure compliance with paragraph (a), including:

(i) a statement that a cord guide may be installed lower than 1600 mm above floor level if the cord is sufficiently secured or tensioned to prevent a loop 220 mm or longer from being formed; and

(ii) a statement that if a cord guide is installed lower than 1600 mm above floor level it must be designed to prevent a child from being able to remove the cord; and

(iii) a statement that if a cleat is used to secure the cord it must be at least 1600 mm above floor level because a child is capable of unwinding a cord from a cleat.

TWO requests following these guides to ensure compliancy at all times.

*Source: Trade Practices (Consumer Product Safety Standard - Corded Internal Window Coverings) Regulations 2010.

Chain tensioning hook is standard with chain operated blinds.

Chain Type & Length

A standard roller blind is operated using a pre-looped metal or plastic chain.

The length of chain is determined by the factory - see table below.

If the blind will be installed in a high position, please specify a chain length which will allow ease of operation.

Stainless steel chains are available for wet areas - an additional charge will apply.

Chain Options

Type	Colours	Drop (mm)	Length (mm)
Stainless Steel	Stainless Steel	< 900	500
		901-1200	750
		1201- 1500	1000
Metal	Metal	1501 - 1800	1250
		1801 - 2100	1500
		2101 - 2400	1750
		2401 - 2700	2000
Plastic	Black, White, Grey, Sandstone	2701 - 3000	2250

Rollease Acmeda Stainless Steel chains are now provided with a certification, assuring customers they are guaranteed for use with Rollease Acmeda Chain Operated Systems.

Valance, Pelmet & Cassette

Attached with a snap-lock function for ease of installation.

If you request the valance or pelmet to go over several blinds please enter the width you require in the cover length section.

FRS120

Pelmet 95

CF90 Square

Valance, Pelmet & Cassette Options

Colours	Mount	Note
Black, Anodised, Sandstone, White. Custom fabric match for valance and pelmet only.	Reveal and Face	Fabric wrap not available in Sunscreen, Light Filter, Vibe, Focus or Solitaire.

Please note that the maximum width the FRS120 Valance is available in is 4.8 m.

Recess

Recess (Inside) - Blind is installed on the inside of the opening.

Face Fit

Face Fit (Out) - Blind is installed on the front of the opening.

Preferably, a sunscreen roller blind would be installed inside the window frame to maximise the blinds thermal insulation.

When determining the mount, check for any obstructions within or outside of the window opening. Some examples are door handles, window winders, bench tops, cabinets or skirting boards which may affect the operation of the blind as it moves up and down.

If there are obstructions, consider changing the roll direction of the blind or mount the blind on the outside of the window frame.

The factory reads blind measurements as width first, followed by drop (W x D). We suggest to always note your measurements down as width x drop, to ensure your measurements are correctly entered into the ordering system.

⚠ Roller blind orders received are assumed to be outside bracket to outside bracket. We do not take any further deductions.

Componentry Breakdown

Item # Description

- 1 RB09 chain and winder
- 2 RB09 Single Bracket
- 3 VX-LX Bracket cover caps S45
- 4 T-Spline Aluminum Tube S451

Item # 1, RB09 chain and winder

Tube

The aluminium tube used to manufacture your blinds depends on the overall blind width. Please refer to the table below.

BLIND WIDTH (mm)	STANDARD ROLL TUBE
0 - 2100	43mm Light
2101 - 2600	43mm Standard
2601 or greater	49mm Heavy Duty

RB09 Single Brackets 40mm

Bracket Size:

- 50 x 65mm

40mm Bracket Covers:

- Available in White, Black, Sandstone, Silver, Grey, Barley
- Surcharged

RB09 Single Extension Brackets 55mm

Bracket Size:

- 55mm x 80mm

55mm Extension Bracket Covers:

- Available in White, Black, Sandstone, Silver, Grey, Barley
- Surcharged

RB09 Dual Slim Top Front Brackets

Bracket Size:

- 85mm x 148mm

Roll Direction:

- Top Front - Front Roll only
- Bottom Back - Front or Back Roll
- Max Roll Size - 70mm

Dual Slim Bracket Covers:

- Available in White, Black, Sandstone, Silver, Grey, Barley
- Surcharged

RB09 Dual Same Side Brackets

Bracket Size:

- 122mm x 122mm

Roll Direction:

- Top Back- Back Roll only
- Bottom Front - Front or Back Roll
- Max Roll Size - 70mm

Dual Slim Bracket Covers:

- Available in White, Black, Sandstone, Silver, Grey, Barley
- Surcharged

RB09 Dual Opposite Side Brackets

Bracket Size:

- 100mm x 115mm

Roll Direction:

- Top Front - Front Roll only
- Bottom Back - Front or Back Roll
- Max Roll Size - 65mm

Bracket Covers: Are unavailable for this bracket

Pelmet 95

FRS120

CF90

Headboard Mounting Rail

Available in anodised and pure white.

Manual: Chain

A chain operated roller blind is controlled using a pre-looped metal, stainless or plastic chain that is located in the chain drive.

This chain can be located on the left or right side.

When it comes to the roll direction, it can be applied as back rolled which is standard, or front rolled.

Back Rolled (Standard)

The fabric rolls off the top of the tube and towards the back of the blind (closer to the window).

The advantage of back-rolling a blind means that the blind fabric sits closer to the window increasing its thermal insulation and reducing the gap between the window glass and the fabric. The disadvantage of back-rolling a blind means that the colour of the fabric backing (if a blackout with white backing on reverse side) will be visible at the top of the blind, however this can be covered using a valance/pelmet.

Front Rolled

The fabric rolls off the top of the tube and towards the front of the blind (away from the window).

The advantage of front-rolling a blind means that the colour of the fabric chosen is visible at the top of the blind and the blind fabric is able to clear any obstructions that may be present. The disadvantage of front-rolling a blind means that the gap between the window glass and the fabric is larger and this reduces its thermal insulation.

Manual: Easy Spring Air

Rollease Acmeda's Easy Spring Air is a chain free child-safe roller blind. Effortlessly raise or lower the bottom rail to the desired position. The premium minimalist design of the Easy Spring Air has eliminated the need for chains.

Easy Spring Air:

- 900mm minimum - 3000mm maximum
- Decorative covers, dual blind and easy-link blind configurations are not available for this control type.

Internal Pull Stick with Wall Clip:

- Adjustable height

To order, select Easy Spring Air from the Control Type option in the Ordering System

Manual: Internal Pull Stick with Adjustable Wall Clip

Internal Pull Stick with Adjustable Wall Clip:

- Min length 60cm
- Max length 130cm
- Surcharged

Motorised: Whispertech™ Range

Motors Wire-free

Whispertech 1.1 Nm (For blinds 550mm - 2200mm wide and up to a 2200mm drop)

Whispertech 2Nm (For blinds greater than 2200mm in width and/or drop)

Remotes & Extras

Bond Bridge Hub

6 Channel Remote

USB-C Charger with Magnetic USB-C Connector. (A USB-C Connector will be provided for every Whispertech motorised blind. Adaptor not included).

ROLLER BLIND | MOTORISATION ACCESSORIES

The solar powered charging option will consistently keep the blind batteries charged. This option does not need an electrician for install.

Charging: Solar Panel 2.0

Charging: WireFree Solar Pack

The new WireFree™ Solar Pack harnesses renewable solar energy to power WireFree™ motorised window coverings and offers a green alternative by reducing the replacement and disposal of standard batteries.

Remote: Push 1 Channel

Push 1 Channel remote offers intuitive, user-friendly operation with tactile buttons, perfect for controlling single blinds or multiple blinds at once. Available in sleek gloss white or elegant matte black, it seamlessly complements the existing Push range with its slim, modern design.

Remote: Push 5 Channel

The Automate Push series fuses luxury and functionality in a well-crafted, minimal design. The 5 channel remote features soft tactile rubber buttons that can control 5 individual or 5 groups of shades, as well as an "All" button that conveniently activates all programmed channels.

Remote: Push 15 Channel

Control 15 individual blinds on separate channels with 5 dedicated grouped channels. Levelling Control activated with a simple double tap to move individual or grouped shades to desired position. P2 and lock programming buttons now accessible via back of remote, without cover removal.

Remote: Push Pro

For the ultimate convenience, the Push Pro elevates your home automation experience with full home control, complete with built-in timer functionality, custom shade naming, and user-friendly configuration.

Remote: Automate RF White 5-Channel

The Automate Paradigm surface mount switch features a contemporary design and a wire-free deployment, making it retrofit-ready for any location. Paradigm 5-channel switches are perfect for all internal motorised blind applications.

Remote: Situo RTS

Control all Radio Technology Somfy® (RTS) products such as draperies, roller/Roman shades, awnings and LED lights with an elegant Situo® RTS control. Sporting a sleek modern look, it's sure to add a touch of elegance to any decor.

Remote: Whispertech

- 6 channels
- 1 group
- Simple to program with the Whispertech 1.1Nm and 2Nm battery-operated motors

Remote: Smoove 1 RTS

The Smoove® 1 RTS surface-mounted wall switch avoids cutting into drywall. This single channel, battery-operated solution is easy to install, and doesn't require an electrician. Compatible with seven decorative color frames (sold separately), users can easily complement any décor.

Automation: Automate Pulse Hub

Smartphone control is only available with the Automate motor + Pulse Hub - additional surcharge applies.

Programming Android

Click here to download the programming guide for Android.

Automation: Connexoon Windows RTS

The Connexoon Window RTS is an intuitive and smart solution which enables you to control Somfy RTS-enabled motors through a smartphone device.

App Features & Benefits

- Up to four user profiles per hub
- Individual or group control of window coverings
- Convenient centralised control of up to 30 motors
- Create up to 32 personalised scenes or commands per hub with ambiance replay (8 scenes per individual profile)
- Control your window coverings whether you're home or away through a Wi-Fi or internet connection
- Schedule the opening and closing of your window coverings with timed events
- Schedule up to eight energy saving commands in-line with sunrise and sunset in your location and time zone
- Voice control compatibility with Google Assistant (direct connection) and Amazon Alex (via IFTT).

Automation: Bond Bridge Hub

- Facilitates complete automation of your motorised roller blinds.
- Seamlessly integrates with the Whispertech™ motor for enhanced user experience. It is also compatible with Rollease Acmeda motors.

Automate Motor Caps

New Automate Motor Caps for 1.1 and 2.0 Li-ion motors.
Comes standard with automate rollers.
Available in white.

Internal Wire Guide

The Internal Wire Guide system allows the blind to be operated and guided by wires, preventing the blind from moving in windy conditions.

Item # Description

- 1 Base 50 Tension Wire Stopp + Adjstr
- 2 Wire Guide Tensioning Cable - 1.2mm
- 3 D30 Bottom Rail
- 4 D30 Bottom Rail WIRE GUIDE End Cap

Side Channels

Adaptable side channels for improved energy efficiency and light block out. Available individually, or complete with CF90 Square Cassette for a complete blackout product.

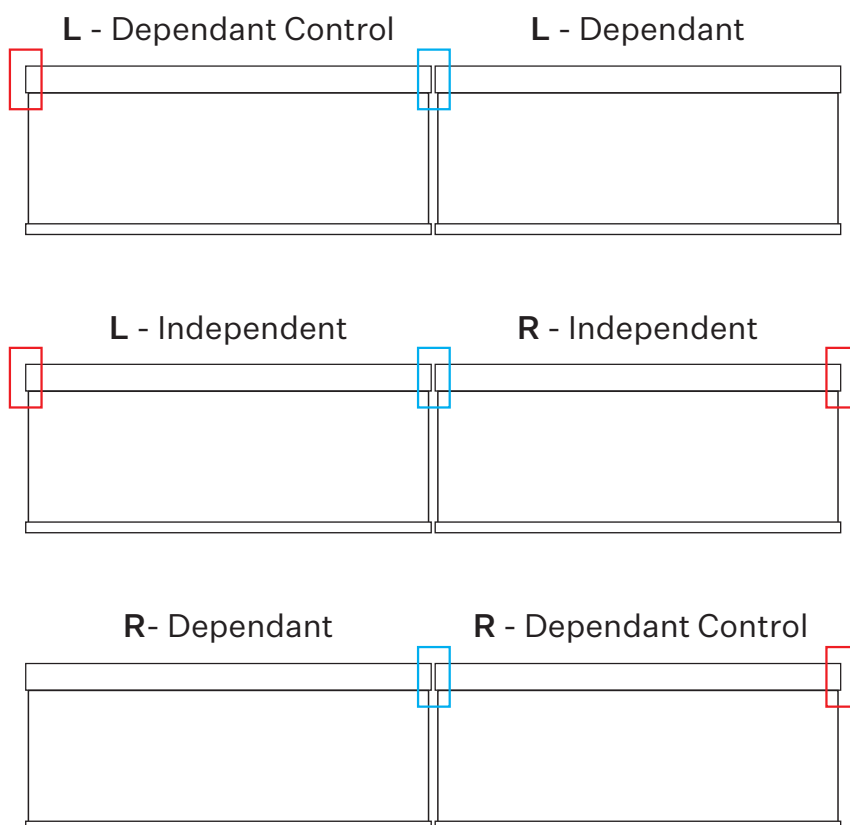

Easy-link Bracket

Easy-link brackets allow you to link up to three blinds together, with different configurations to suit Left and/or Right control requirements. The following diagrams show the varying blind configurations available with easy-link.

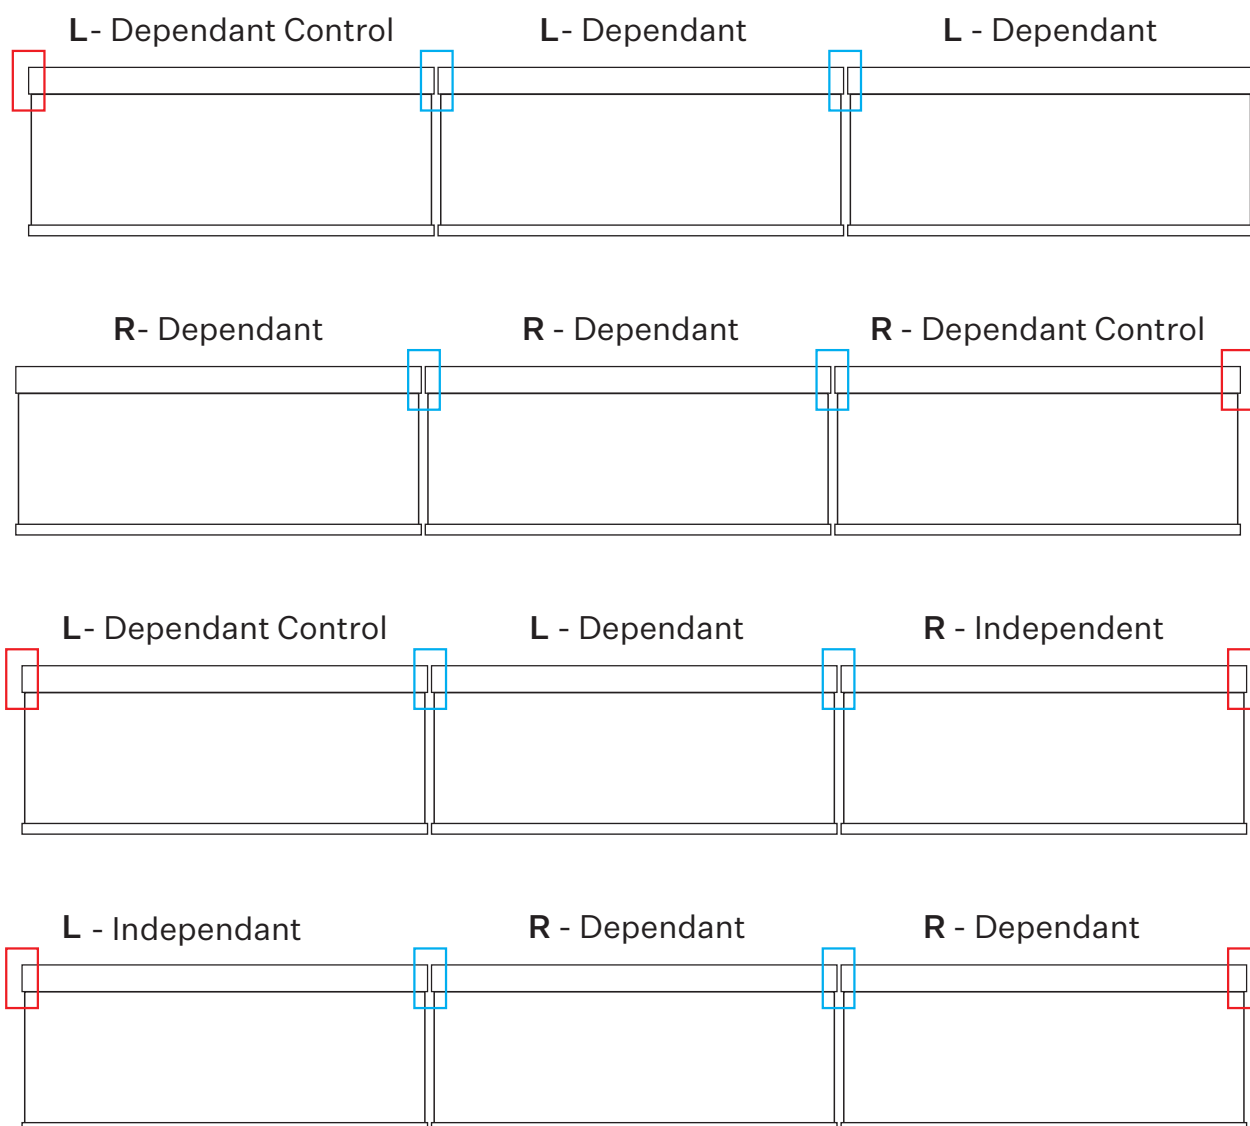

2 Blind Configuration with Easy-link - Control side - Easy-link

3 Blind Configuration with Easy-link

 - Control side  - Easy-link

How to Order

Easy-link blinds can be ordered under the one item.

To order Easy-linked blinds, select Yes under Easy-link.

Then select the blind configuration.

If there are uneven blind widths, select Yes and then enter your sub-widths from the very first left bracket to the right bracket of each blind. There is no need to enter the 3rd blind sub-width.

To watch a full tutorial video on how to order easy-link blinds, refer to the Product Videos in the Sales & Marketing Centre.
