TWO GUIDELINES

Orders that are released to TWO are processed in the most timely manner possible. As such, any changes made to an order once it is released to TWO cannot be guaranteed to be applied.

Invoices for orders with multiple products are due upon receipt of each product.

If the order is already in production, initial costs, cancellations or any change costs will be the responsibility of the dealer to cover.

All drawings, notes and emails with questions must be answered before an order is entered in to the production line. Delays in the timely processing of these by customers will lead to longer lead times.

All factory/freight repairs are to have photographic/video proof. If neither are available at the time of placing the repair, it will be processed as a dealer responsibility. TWO will credit back the cost of the repair once proof of factory/freight responsibility is given.

For special request/non-standard/limited availability items please check first with Head Office for availability. Any surcharges for these items will be the responsibility of the dealer to cover, even if it is not listed on the price list.

PDF Estimates generated from the system may not reflect final pricing. If all items are not selected in the order form or details are added to the notes section, the price may be altered.

All dealers are responsible for having the most current price lists and product manuals. If unsure please contact your account manager to confirm.

CARE & MAINTENANCE

In order to prolong the life of your Zipscreen blind and provide optimum performance, we recommend the following care and maintenance guidelines.

Regular Cleaning (At least every 3 months)

- Ensure surfaces are free from dirt, dust and grime.
- Clean the Zipscreen blind with a soft brush.
- Run a soft brush along side channel to prevent dust and dirt build up on zip.
- Clean aluminium with a soft cloth and warm soapy water or a small amount of mild detergent if required. Do not use abrasive cleaning agents (eg. Ajax or steel wool) in any circumstance.

Do Not:

- Do not leave the Zipscreen blind down when you are away from your home or in extreme weather conditions.
- Do not roll the Zipscreen blind up when wet (to avoid mould and mildew).
- Do not force the Zipscreen blind up or down if it is jamming. Forcing the Zipscreen blind may result in further damage (for example, the zip may be forced out of the side channel or the fabric may rip). Contact your Zipscreen supplier for guidelines of how to fix.
- Do not operate spring controlled Zipscreen blinds from the sides - always use the Weight Bar or Handle and pull from the centre.

Common Characteristics:

Depending on the fabric selection, when the Zipscreen blind is initially pulled down some ripples may be evident. The ripples will lessen over time as the weight of the blind will stretch the fabric slightly and the ambient temperature will heat the fabric.

When a motorised blind is operated some 'jolting' may be evident. This effect is due to wind gusts causing spontaneous friction between the zip and side guides. This occurrence does not damage the blind.

Operate the Zipscreen blind at least once a week to prevent build-up of dirt that will inhibit the operation of the blind.

Custom

Hardware is available in 7 standard colours plus the option to custom powder coat.

Custom Colours

For custom colours, please refer to the current Dulux Powder Coat Selector.

Textured Colours

White

Black

Monument

Sleek, textured finishes are available in black, white and monument. The finish is highly durable, making scratches and marks less noticeable.

The textured finish is only available for the Box 120, side channels, F56 & F72 base rail and Face Fit Rail. Brackets and other headbox options are not available in this textured finish.

ZIPSCREEN | MOUNT

Side Fit

Side Fit (Inside): The Zipscreen is installed on the inside of the opening.

Face Fit

Face Fit (Outside): The Zipscreen is installed on the front of the opening.

When determining the mount, check for any obstructions within or outside of the opening such as hand rails and check for out-of-square measurements, which may affect the operation of the screen as it moves up and down.

Componentry Breakdown

Zipscreen, Headbox, Motor, F56 Weight Bar, Ultra Lock

Automate Molex with Plug

- Provides a quick & easy connection option for installation of our external motors when a nearby GPO is available.
- Pre-terminated with a standard 3-pin plug, so an electrician is not required on site to complete the job.
- Maintains the use of the in-line connection.

Automate External 240V AC Wind & Light Sensor

Features an anemometer to measure wind speed and a lux meter to measure light intensity and perform an automated action.

Integrated LDC displaying signal strength, wind speed and lux values. Switches to off mode for energy saving.

Compatible with all ARC external motors.

Can be mounted to the roof, wall, eave or fascia, to suit your requirements.

ZIPSCREEN | MOTORISATION ACCESSORIES

Remote: Push 1 Channel

Push 1 Channel remote offers intuitive, user-friendly operation with tactile buttons, perfect for controlling single blinds or multiple blinds at once. Available in sleek gloss white or elegant matte black, it seamlessly complements the existing Push range with its slim, modern design.

Remote: Push 5 Channel

Remote: Push Pro

For the ultimate convenience, the Push Pro elevates your home automation experience with full home control, complete with built-in timer functionality, custom shade naming, and user-friendly configuration.

Remote: Push 15 Channel

Remote: Automate RF White 5-Channel

The Automate Paradigm surface mount switch features a contemporary design and a wire-free deployment, making it retrofit-ready for any location. Paradigm 5-channel switches are perfect for all internal motorised blind applications.

Remote: Situo RTS

Control all Radio Technology Somfy® (RTS) products such as draperies, roller/Roman shades, awnings and LED lights with an elegant Situo® RTS control. Sporting a sleek modern look, it's sure to add a touch of elegance to any decor.

ZIPSCREEN | MOTORISATION ACCESSORIES

Automation: Connexoon Windows RTS

Connexoon Window RTS is an intuitive, smart and playful app control solution designed to simplify your life.

- Control for up to 30 RTS channels per Connexoon from iOS and Android devices
- 4 scenarios per Connexoon
- 4 modes per Connexoon
- 8 schedules per Connexoon
- Automate window coverings with Scenes and Schedules
- Supports Up/Down/Stop commands and incremental control (tilt/brightness)
- Remote access via internet connection
- Ability to connect 4 smartphone devices
- Compatible with entire range of RTS products
- IFTTT (If This, Then That) compatible
- Ability to control via third-party voice assistants include Google Home and Amazon Echo
- Trigger scenes and schedules using voice commands or pre-set automations

Automation: Linx® Hub

- Radio Frequency Range: 80-100m line of sight.
- WIFI 2.4 GHZ | Power 5V-1A DC
- Size: 135mm x 74mm x 32mm
- 5 years replacement warranty

Automation: Bond Bridge Hub

- Facilitates complete automation of your motorised roller blinds.
- Seamlessly integrates with the WhisperTech™ motor for enhanced user experience. It is also compatible with Rollease Acmeda motors.

ZIPSCREEN | OPTIONS

Bubble Strip

The Bubble Strip is the default factory option unless otherwise specified.

Ultra Seal

The Ultra Seal is the only option available for the Ultra Lock. The Ultra Seal comes standard with the Ultra Lock when Ultra Lock is selected. As the Ultra Lock drops down in order to unlock itself, the Ultra Seal allows for the deduction at the bottom. No other seal is appropriate for the Ultra Lock.

Ultra Lock

The Ultra Lock utilises a heavy-duty latching pin and hidden integration to secure and tension your blind; ensuring a reinforced, ultra-smooth fabric finish. The Ultra Seal comes standard with this lock. (Only available with Spring operated)

Wind Lock

The Wind Lock comes standard with the Spring Assist control.

ZIPSCREEN | OPTIONS

Base Rail - F56

Base Rail - F72

The F72 comes factory standard with the Zipscreen Extreme (4m - 5.8m wide).
